

Data Protection Impact Assessment (DPIA) – Google Pay

Prepared using the EDPB DPIA Template Structure

0.1 Controller(s)

Field	Details
Controller	Google LLC / Google India Digital Services Pvt. Ltd.
Management units responsible	Legal, Compliance, Privacy, Product, Information Security
Point of contact	privacy@google.com
DPO	Google appointed DPO/privacy office

0.2 Processor(s) and sub-processors

Field	Details
NPCI	UPI routing and settlement
Partner Banks	Authentication and payment settlement
Cloud Providers	Infrastructure hosting
Fraud Detection Vendors	Fraud monitoring and analytics

0.3 Name of processing

Field	Details
Internal Name	Google Pay Digital Payment Processing
Version	1.0

0.4 Planning of processing

Field	Details
Launch Date	Existing operational processing
End Date	Ongoing processing activity

0.5 DPIA Technical Sheet

Field	Details
Teams involved	Privacy, Legal, Product, Security, Risk Teams
Guidelines used	GDPR, EDPB DPIA Guidelines, RBI Guidelines, PCI-DSS, ISO 27001
Reason for DPIA	Large-scale financial processing and fraud monitoring
Scope	UPI onboarding, payment processing, fraud prevention, customer support
Completion date	2026-05-19

1.1.a Processed Personal Data

Field	Details
Identity Data	Name, mobile number, email
Financial Data	UPI ID, bank account details, transaction data
Technical Data	IP address, device ID, app logs
Optional Data	Contacts and location if enabled

1.1.b Purposes of Processing

Field	Details
Payment Processing	Facilitating UPI payments
Fraud Prevention	Preventing unauthorized transactions
Customer Support	Complaint handling and dispute resolution
Analytics	Improving service quality

1.1.d Nature, Scope and Context

Field	Details
Nature	Digital payment processing using UPI infrastructure
Scope	Large-scale processing across India
Context	Involves users, banks, NPCI, merchants and cloud vendors
Cross-border transfers	Possible subject to contractual safeguards

2.1.a Legal Basis

Field	Details
Contract	Payment execution
Consent	Optional permissions like contacts and location
Legal Obligation	Financial regulatory compliance
Legitimate Interest	Fraud detection and platform security

2.2.a Data Minimisation and Retention

Field	Details
Minimisation	Only payment-relevant data collected
Retention	Stored according to legal and regulatory obligations
User Controls	Users may revoke optional permissions

2.3 Security Measures

Field	Details
-------	---------

Encryption	Data encrypted at rest and in transit
Authentication	OTP verification and MFA
Monitoring	Real-time fraud monitoring
Access Control	Role-based access and audit logging

3. Necessity and Proportionality

Field	Details
Necessity	Processing is necessary to provide digital payment services
Proportionality	Safeguards reduce risks to acceptable levels
Benefits	Fast payments, financial inclusion, fraud prevention

4. Risk Assessment

Field	Details
Risk	Unauthorized access to financial data
Likelihood	Medium
Severity	High
Mitigation	Encryption, MFA, fraud monitoring

4.2 Additional Mitigation

Field	Details
Enhanced Monitoring	AI-driven fraud detection
Vendor Reviews	Periodic security assessments
User Awareness	Privacy notices and phishing alerts

5. DPO Advice

Field	Details
Recommendation	Continue periodic audits and transparency improvements

6. Conclusion and Decision

Field	Details
Decision	APPROVED
Justification	Residual risks acceptable with implemented safeguards
